

CAMPAIGN PROCESSOR™

Campaign Processor™ is a high speed email solution for enterprises with big data requirements where security are is essential.

Campaign Processor gives you email sending autonomy and cuts out the middle man. Your data is exactly where you want it, whether that's in your own building, in the cloud or in a data centre of your choice.

It can deliver a million emails in just ten minutes and, no matter how many emails you send, Campaign Processor™ never slows down.

If you've got a vast amount of sensitive data then retaining control and maintaining security is paramount.

When it comes to really big data you should never take risks, and trusting your sensitive data on the systems of a third party - like an email marketing service provider - is an added vulnerability.

Campaign Processor™ is the answer.

Undertake all the email marketing you want, at extraordinary speed, without losing control of your data. Implement Campaign Processor™ in-house, in the cloud or wherever suits you.

Relax, safe in the knowledge that your data isn't being exposed to anyone outside your company. Your clients will appreciate the added security and so will you.

- Complete control over email sending
- Reliable and powerful
- Flexible implementation options
- Lightning fast

we make it simple

About Forfront

At Forfront we make it simple for businesses to expand and grow. Our repertoire covers software development, state-of-the-art mobile apps, a suite of customisable digital marketing services, website creation, bespoke corporate branding designs, the leading email marketing product e-shot™ and more.

Since 1998 Forfront has grown rapidly year on year. We help thousands of clients including many household names and industry-leading firms.

Peace of mind

For sixteen years we have understood the importance of combining efficient delivery with data security.

That's why we developed Campaign Processor™. To give our email marketing platform e-shot™ a robust, secure and extremely fast engine.

Now, for the first time, we're making Campaign Processor™ available to enterprises.

So you can have the same security, speed and control with your email sending that we enjoy, plus the peace of mind that nobody else is involved.
