

SOFTWARE SOLUTIONS

Since 1998 we've helped businesses develop the software they need.

Throughout our history we have specialised in designing, writing, hosting and maintaining software solutions including: Software as a Service (SaaS); online applications; websites; ecommerce projects and Application Service Provision (ASP).

We use cutting-edge technology to create digital solutions that enable thousands of companies to work more efficiently and grow.

In this time we've worked on complex bespoke software for companies as varied as a leading NHS information provider, producers of an e-learning competency tool for the financial industry, a service provider to the property industry, Premier League football clubs, one of the biggest publishing houses in the world and local governments as well as thousands of other companies.

We have skilled, in-house teams of programmers, software designers, project managers, business analysts, test analysts, graphic designers and IT specialists.

Our development team alone boasts over 100 years of experience between them and fluency in more than 16 programming languages! These include A++, Java, CSS, C#, C/C++, HTML, PHP, Perl, Python and many more.

About Forfront

At Forfront we make it simple for businesses to expand and grow. Our repertoire covers software development, state-of-the-art mobile apps, a suite of customisable digital marketing services, website creation, bespoke corporate branding designs, the leading email marketing product e-shot™ and more.

THE BENEFITS

- Cost-effective projects that can be delivered on time
- Reduction of maintenance budgets
- In-house development teams
- Flexible, customisable and scalable solutions

"Binley's has worked with Forfront for approximately 15 years. During this time we have found ourselves to be exceptionally happy with the services and support they provide. From our perspective, the strength of the two sites is greatly enhanced by the management tools offered by Forfront which enable us to maintain the sites with little or no intervention from Forfront. This has significant cost and time saving implications for the overall management of the site." - **Walter Brinzer, Binley's**
